Bridging Gaps Through a Culture of Improvement

2025 Learning Site Visit

Friday, April 25th, 9am-3pm

Clean Water Services - Rock Creek Conference Room

3235 SE River Rd, Hillsboro, OR 97123, USA (meet at the facility)

Friday, April 25th

Topic of the Day: Mission in Action

One of the best ways to experience performance excellence is to see it in action.

Registered attendees will **meet at the Clean Water site** to visit and experience a culture of improvement while exploring best practices and key learnings. Most people gain confidence when they "see" performance excellence through the lens of another organization. Join us for a learning journey to explore Clean Water Services activities to deploy strategy, build relationships with stakeholders, and deliver on their mission at high levels.

This site visit will provide a "hands-on" experience of what it is like to restore and protect a sizeable watershed that has been impacted by years of urban growth. Attendees and participants will be exposed to Clean Water Service's learning and use of performance excellence principles to assess and improve performance across all facets of operations including:

- Operational effectiveness and exceeding compliance standards
- Strategic planning and plan achievement
- Workforce development and engagement
- Building relationships with a wide array of stakeholders
- The day will conclude with a panel to discuss and answer your questions

Lunch provided.
